Just Eat

Stig Telfer
StackHPC
Chair Scientific WG

Andrew Sheppard
HMRC
Open Infrastructure Days UK brings together hundreds of IT decision makers, cloud operators and technology providers to discuss cloud computing and learn about open source cloud software in central London.

Open source cloud software has instigated a paradigm shift in the infrastructure and IT industry, causing vendors, operators, and integrators to collaborate together in the open to innovate and produce solutions which eliminate the need for reliance on traditional vendor lock-in solutions, and provide the flexibility to purchase commodity hardware and free their supply chain.

The 2-day event consists of a conference day and a workshop day and will feature speakers from operators, developers and end users across a number of ecosystems and problem areas including open hardware, open source container and cluster management software, open source resource management, automation, scientific and research computing, continuous integration and delivery, and more!
